

Nutri-King BMR 6

SORGO SORGHUM X
SUDANGRASS

Nutri King BMR produces a high leaf to stem ratio with sweet juicy stems. It is one of the best for hay, grazing, baleage, or silage. Cattle prefer this hybrid over non bmr hybrids. Nutri King BMR 6 has reduced lignin which improves the fiber digestibility and palatability. With the increase in efficiency and utilization Nutri King BMR will give you better gain per acre. We have seen yields of 5-8 DM tons/acre. It has an extensive deep root system allowing it to do well under dry conditions.

Disease / Insect Ratings

Downy Mildew: Resistant
Anthracnose: Moderately Resistant

Agronomic Traits

Early Season Vigor: Excellent
Height: 40" - 50"
Maturity: 50 - 55 Days to Boot
Regrowth: Excellent
Midrib Type: BMR 6
Plant Type: Juicy Sweet
Photoperiod Sensitive: No

Seeding Rates

Seeds Per Pound: 15,000 - 18,000
Soil Temperature: 62°F

Seeding Method	Harvest Stage	Dryland Lbs / Acre	Irrigated Lbs / Acre
Drilled	Boot	20 - 35	45 - 60
Broadcast	Boot	25 - 40	50 - 65

Crop Use Information

Life Cycle: Annual
Ease of Establishment: Good
Double Cropping: Excellent
Dryland / Irrigated: Both
Min. / Max. pH: 6.0 - 7.5
Hay / Baleage Yield Potential: 5 - 8 DM Ton / Acre
Silage: Excellent
Rotational Grazing: Excellent
Continuous Grazing: Excellent
Cover Crop: Good
Digestibility: Good IVTD, TDN, NDFD %
Palatability: Sweet & Soft
Fertilizer: 1-1 ¼ Lbs N per growing day / acre

Harvest

First Cutting: 50 - 55 days
Second Cutting: 25 - 30 days
Third Cutting: 25 - 30 days

- Nutri King BMR is harvested between 40-50 inches or in the boot stage. It is quick to grow to maturity
- Cut 6-8 inches above ground level for best regrowth
- Cutting in the boot or pre-boot stage ensures a higher quality of feed and better regrowth
- Following a freeze, extreme drought, or fertilizer application followed by stress. See our guide for how to manage Prussic Acid and Nitrates.
